Troubleshooting labs ...during the lab sessions

Post the issue in Slack; think of it as asking a question in a traditional classroom. Include any screen shots, screen recordings, etc you think might help solve the problem.

We encourage classmates to help each other, so if you know the answer to another student's issue, please do respond.

All our responses will be via Slack so that all students can see the resolution.

Note: for private issues, chat is also possible with us privately in Slack (or email).

Troubleshooting labs ...outside of the lab sessions

Search Slack Chatroom

Check Google / StackOverflow (or equivalent) for possible solution

Post the issue in Slack Chatroom

Ethos

- Self-directed learning outside of lectures / labs.
- Inquisitive and motivated.
- Helpful to peers.
- Engagement and staying current with the module.
- All work submitted must be your own work.
 - Note: all code/approaches given in the module by us can be re-used / re-purposed in your assignments.

Introduction to Processing

What is Processing?

“Processing is a programming language,
development environment,
and online community.”

[Source: https://processing.org/](https://processing.org/)

- Some online examples developed using Processing:

<http://www.thesheepmarket.com/>

<http://balldroppings.com/js/>

<http://www.openprocessing.org/browse/>

What is Processing?

Processing...

...can be used to develop static or interactive online material and data visualisations.

...is often used by visual artists.

...produces visual and interactive representations of programming code.

What is Processing?

- Different programming languages can be used with Processing
e.g. :
 - Java: we will use this language.
 - JavaScript
 - Python
 - CoffeeScript
 - Etc.

Why are we using Processing?

*Processing is increasingly used
to teach computer
programming fundamentals
(<https://processing.org/overview/>)*

Some eBooks in WIT library

We will start coding in Processing
in the afternoon session
